

My Jama Masjid

मेरा जामा मस्जिद

My name is Jasim. I am 12 years old, studying in class 6.

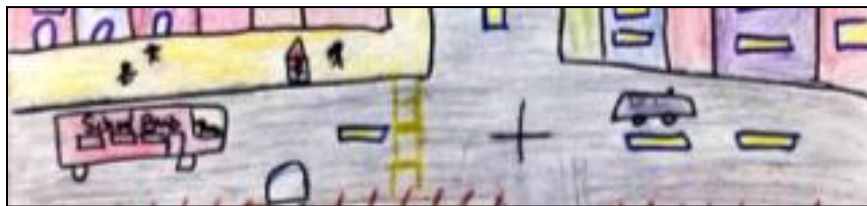

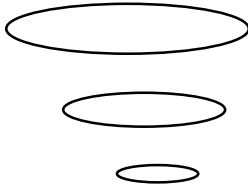

This is where I live in Meena Bazar. It is in Old Delhi area. My father is a street vendor. I go to a day-care centre to get my daily meal, take a bath and to study.

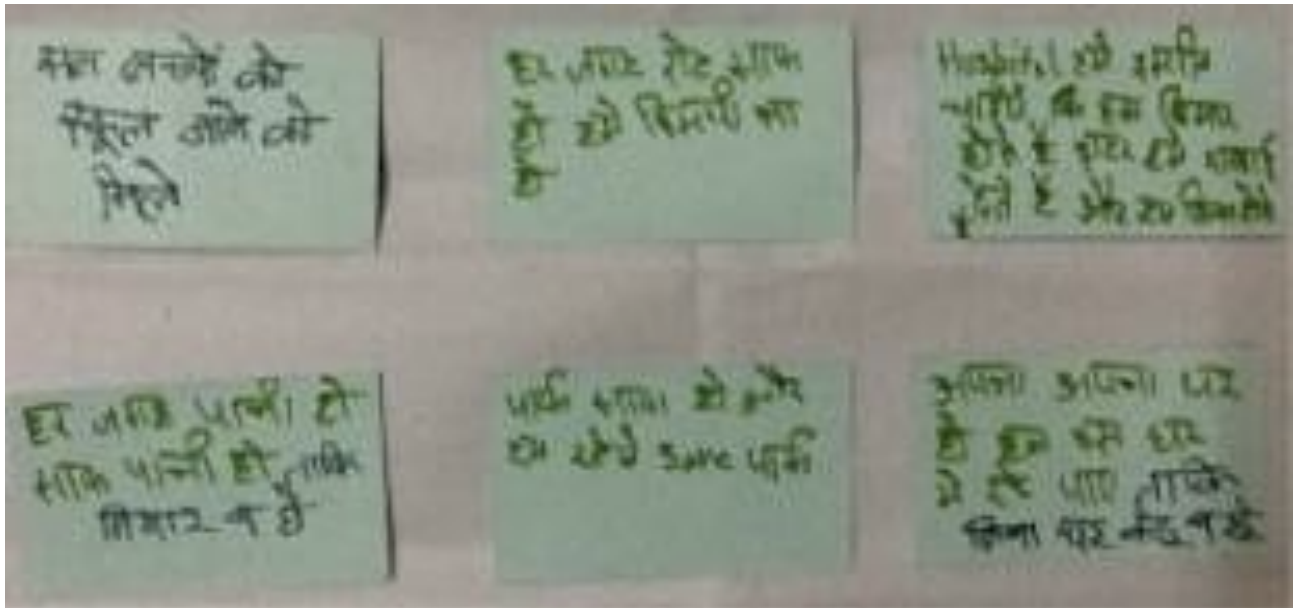

This city is my dream for Meena bazaar.

I want Meena Bazaar to become a smart city. For this, there should be a school that provides a school bus for all children. There should be a government hospital that is close to Meena Bazaar, a safe children's park, and more sources of drinking water. The city should be clean and there should be no manholes. Every family should have a house to live in.

Importance of these infrastructures to make my city smart

Drinking water: There should be clean drinking water available at all places so that people don't fall sick.

Children's park: so that children are safe while playing.

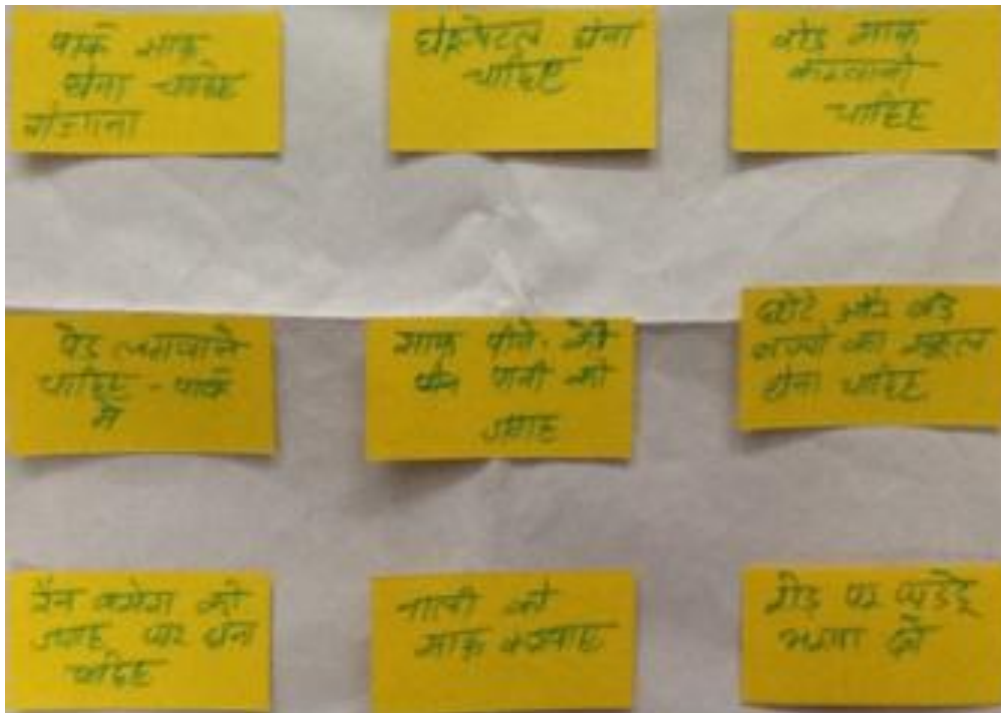

House for everyone: so that no one will live on streets.

School: so that every child can go to school

Hospital: so that if someone falls ill she/he will visit a doctor to get treated and recover.

Clean city: so that people don't fall sick.

Solutions

Park and roads should be cleaned daily

Trees should be planted in the parks.

Trees should not be cut

Clean water should be there at every place

There should be a separate school for small and older children

Instead of shelter homes there should be houses provided for us
