

## My Meena Bazaar

-Alam  
मेरा मेना बाजार

My name is Alam. I am 12 years old, studying in class 6.

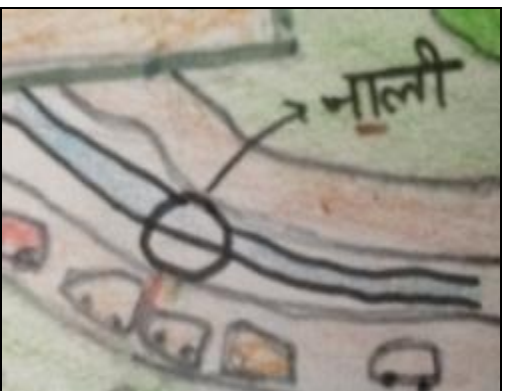

This is where I live, Kot market, Meena Bazar. It is in Old Delhi area. I live with my father who is a rickshaw puller. I go to a day-care centre for my daily meals, take a bath and to study.

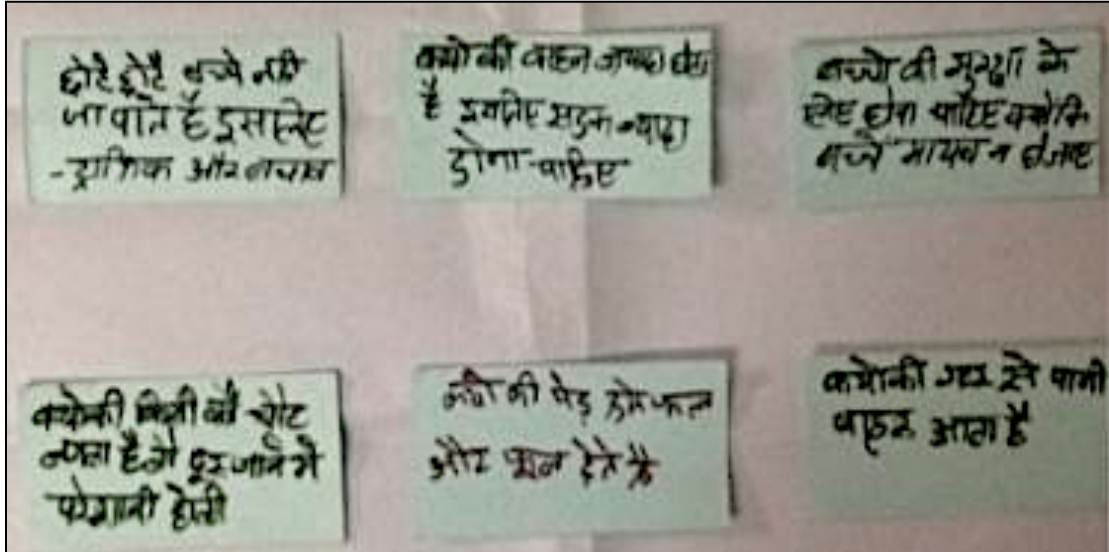

This is my dream for Meena bazaar.

Meena Bazaar can be a smart city only if there is a school and a hospital close by. It should also have more roads, lots of green trees and a children's park. The manholes should also be covered.

## Importance of these infrastructures to make my city smart

**Trees:** as it gives us flowers and fruits.

**Children's park:** so that children are safe while playing.

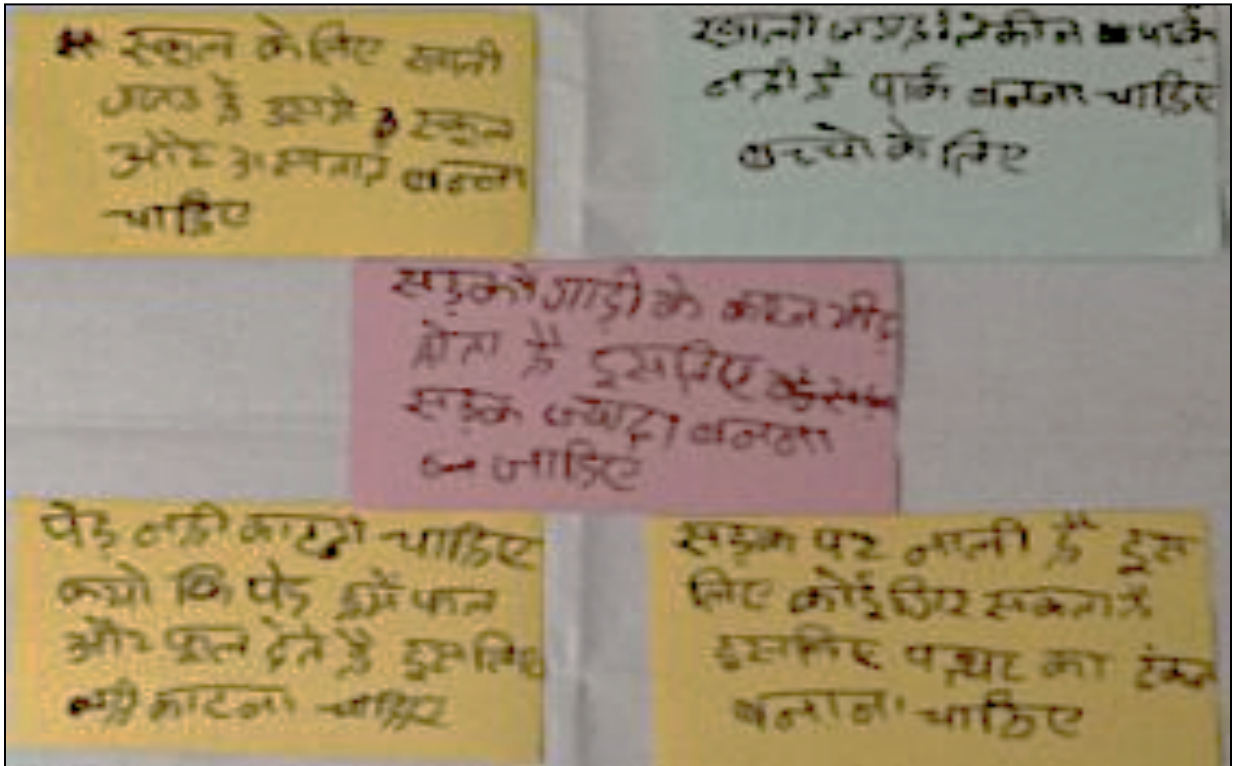

**Covered manholes:** to keep the roads clean and to make sure no one falls inside manholes

**School:** to avoid children getting abducted while they go to school that is located far away

**Hospital:** so that if someone gets injured or falls ill she/he does not need to go to far off hospitals to get the treatment.

**Road:** to reduce traffic jams.

## Solutions

There are many open spaces that are not used in our area. These could be used to build a school, a hospital and a park

Manholes should be covered properly with a lid to keep the road clean and to make sure that no one falls inside them.

Trees should not be cut.

More roads should be made.
